DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-25 in Paper No. 10242003 is acknowledged. The traversal is on the ground(s) that the search and examination of the entire application can be made without serious burden on the examiner. This is not found persuasive because the search for the apparatus requires the search of the apparatus class which is not required for the method.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over DeSimone (US Patent 5,783,082).

DeSimone teaches a process of cleaning. Example 6 teaches cleaning a photoresist layer. The photoresist layer is cleaned using a method as

described in Example 1. The cleaning occurs using supercritical carbon dioxide.

Therefore, it would have been obvious to one of ordinary skill in the art to have cleaned a pseudo plastic layer using supercritical fluid without damaging (or removing the layer) because DeSimone teaches excellent cleaning of a photoresist layer used in the production of electrical devices.
